Webinar

Mastering Export Controls in Germany: Essential Skills for Beginners

Learn to Navigate Export Regulations Effectively

Equip yourself with foundational knowledge and practical strategies essential for mastering export controls. Whether you're a managing director, export control officer, or new to export regulations, this webinar provides insights into:

Key Learning Objectives

- Strategizing and implementing effective export control measures
- Documentation strategies according to the requirements of the internal compliance program (ICP)
- Understanding practical license requirements for listed and non-listed goods
- Exploring detailed reporting protocols, including recipients, intervals, and critical information
- Identifying, escalating, and mitigating risks and violations in customs and export control
- Learning how to identify dual use products
- Enhancing communication impact through compelling visual presentations in reports

Who should attend?

This webinar is tailored for beginners eager to understand and apply export control measures. It's ideal for managing directors, export control officers, and professionals encountering export control regulations in their daily roles.

Seminar Aim

Join us and gain valuable expertise from an industry leader to confidently navigate the complexities of export controls.
